

Ms. Eng's Challenge of the week!

Hello boys and girls. I hope you had a nice weekend even though it was chillier than usual. Here is your Music Activity for the week.

Make a Water Xylophone

1. Find clear water glasses/jars. It would be more helpful if they are the same size, but they don't have to be.
2. Fill each glass with different amounts of water. Fill the first glass with the most amount of water and put less water in each glass after that.
3. To make it more fun, use a few drops of food colouring in each glass to make your xylophone more colourful.
4. Use a spoon and tap each glass. Listen to the different sounds. Tap the glass with the most amount of water. Tap the glass with the least amount of water. Which makes a high pitch (sound) and which makes a low pitch?
5. Try and create your own song.
6. If you want a challenge, try to play a simple song that you already know on your xylophone, such as Twinkle Twinkle or Hot Cross Buns.

** Here is a tutorial to help you. <https://www.youtube.com/watch?v=sIO-JhMvu6M>

Have fun!!
